

# Recycling & Waste 2021/22

West Devon  
Borough  
Council

Recycling Week				Garden waste customers

Recycling & Refuse week			

Remember to put your waste out before 7.30am on your collection day.

		paper		newspapers & magazines		books
		glass bottles & jars		cartons		

Please sort each recycling material by type within the boxes.

		cardboard		printer cartridges		clothes
		corrugated cardboard		batteries		

		food tins & drink cans		empty aerosols		foil
		plastic bottles lids on		plastic pots, tubs & trays	No black plastic or film	

	Food Waste Caddy	Cooked and uncooked food waste including meat, bones & fish should be put into your food caddy, not in refuse sacks. <b>You can now use any bag to line your caddy.</b>		food waste

14 January 2022	17 January 2022
17 - 21 January 2022	One day late

# Nothing we collect goes to landfill!

## What happens to my recycling?

### plastic packaging

**HOW?** Sorted by plastic type and colour before being shredded, melted and reformed into pellets ready to be made into new products.

**WHERE?** Assorted UK facilities depending on plastic type.

Recycling a single bottle can save enough energy to power a 60W light bulb for up to 6 hours.

### clothes

**HOW?** Textiles are reused in the UK or in developing countries. End of life textiles are shredded to create items such as cloths.

**WHERE?**

UK and Developing Countries.

Recycling 1 tonne of clothes is equivalent to taking 6-8 cars off the road.

### paper & card

**HOW?** Mixed with water to make a pulp. Staples, tape and carton linings are removed ready for it to be made into new paper or card products.

Paper, card and cartons are recycled separately for quality reasons.

**WHERE?**

- Paper - Norfolk, UK
- Cardboard - Kent, UK
- Cartons - Kent, UK

It takes 70% less energy to recycle paper and card than it does to make it new from raw materials.

### glass bottles & jars

**HOW?** Sorted by colour, lids and labels removed. Then crushed and heated at 1500°C and pressed into new glass products.

**WHERE?** Cwmbran, UK.

Recycling a glass bottle will save enough energy to power a laptop for 30 minutes.

### steel cans

**HOW?** Melted down at 1700°C ready to be made into new steel products.

**WHERE?** South Wales, UK.

100% recyclable, they can be recycled again and again.

### aluminium cans & foil

**HOW?** Melted down at 750°C to be made into new cans.

**WHERE?** Cheshire, UK.

Recycling one can saves enough energy to power a TV for 3 hours.

1 can = 3hrs TV

### batteries

**HOW?** Sorted by metal type so they can be used to make new products.

**WHERE?** Halifax, UK.

It takes 50 times more energy to make a single use battery than it gives out during its life.

## Save yourself a trip to the recycling centre!

We'll collect garden waste from your home.

To sign up and for full terms and conditions visit:
